

FEED BEAM PROTECTION EXTENSION R557

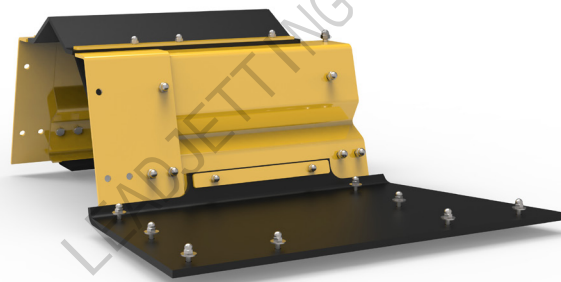

The Feed Beam Protection Extension R557 increases the length of the standard protection. This enables protection for a wider feed beam to protect from flying debris when cutting. One protection per side of the standard protection can be fitted.

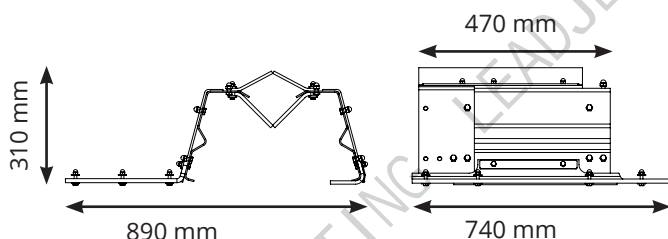

The Feed Beam Protection Extension R557 is used together with the Feed Beam Extension R557.

TECHNICAL DATA

Increased cutting width per section	470mm (1ft 6.5in)
Total cutting width with extensions	3000mm (10ft)
Weight	29kg (63lb)

SIZE

OPTIMAL FOR

- To be used with Conjet Lance
- For wide horizontal hydrodemolition
